## Summary

After 5 months serving as a reserved soldier in the 'Haravot Barzel' war, I am eager to start my career as a front-end developer. I have been passionate about solving problems using logical thinking and coding. I graduated from Fullstack Development Bootcamp. I am excited to bring my newly acquired skills and knowledge to **Fullstack development position**.

---

## Professional Skills

- Proficient knowledge of **React, NodeJS, JavaScript, REST API, HTML, CSS**.
  - Also familiar with **Git, GitHub, Vite, Redux, React Router, Styled Components, Express, Figma, i18n, Mongoose, OpenAI API, Auth0, Bash**.
  - Databases: **MongoDB**.
- 

## Work Experience

- **May 2023 – July 2023 Internship as a Fullstack developer, Makes Innovation Hub**
    - Experienced in Frontend and Backend development using technologies like **Git, GitHub, Figma, Vite, NodeJS, Redux, REST API, Auth0, i18n, and scrapping**.
    - Collaborated effectively within a team of developers using agile methodologies: **sprints, demo presentations, and daily meetings**, fostering open communication and ensuring timely delivery of project milestones.
    -
  - 2020-2022 – Truck Driver, Shlomo Group.
- 

## Projects

- **Harmony** – Music that showcases the top 10 songs in Hebrew and the top 10 songs in Arabic, relevant to the current time. By clicking on a song's title, users can access its lyrics/artist as well as its translation into the other language.
    - Worked with **Vite, Redux Toolkit, Rtk query, REST API, React Router**
    - Worked with **Git & GitHub, Figma**
    - Exposed **OpenAI API**
    - <http://harmonymusic.tech/>, [github: /Makes-Innovation-Hub/harmony](https://github.com/Makes-Innovation-Hub/harmony)
  - **iWannaPlay** – React web application for gamers who want to find new teammates in F2P games.
    - Worked with **React and NodeJS**
    - Worked with **Express, MongoDB and Mongoose**
    - Exposed registration and authorization service
    - [netlify: iwannaplay](https://netlify.com), [github: /ArturLabenskyy/Bootcamp-Final-Frontend](https://github.com/ArturLabenskyy/Bootcamp-Final-Frontend)
  - **Reddit Positive Scrapper** – 24 hours project from **Hackaton**. This app was created for scrapping and filter subreddit's topics with **OpenAI API** integration. After the user enters a topic that interests him, he will see only positive posts that he considers acceptable and not offensive using OpenAI API as filter for negative posts.
